

Developmental Psychology Professional Practice Flowchart

Step 1: Contact the Professional Practice Coordinator for Developmental Psychology.

A. To discuss professional practice opportunities and obligations.

B. To locate an agency and faculty supervisor to match student interests.

(Note: If you want the professional practice to include funding you should contact the Professional Practice Coordinator approximately 10 weeks before the start of the semester.)

Step 2: Contact agency and secure placement.

(Note: This will probably include sending a current resume and completing an interview.)

Step 3: Download and complete the [Professional Practice Agreement Form](#) (.doc).

Step 4: When the agreement is completed, return it to the Professional Practice Coordinator. You will be able to register for professional practice credit after the agreement is approved.

Step 5: The student will complete agreed upon hours, duties, and objectives as well as a self-reflection paper that must be submitted to the Professional Practice Coordinator the last week of the semester.

Step 6: The Professional Practice Coordinator will contact the agency supervisor regarding the student's performance evaluation. The Professional Practice Coordinator will assign a grade based on the student's self-reflection paper and agency supervisor's evaluation.
